### Course notes, tips & ideas

- Use Google Earth & Street View and “Grid Reference Finder” when plotting the course, but remember the use of GPS navigation is not permitted except in an emergency
- There is still some road walking but where possible it has been reduced. However, there are a number of paths that break out onto roads and in some cases with poor visibility left & right, Note these locations.
- Many of the bridleways see heavy use from horses and ‘mountain bikes’. Depending on weather conditions these two users can leave sections badly rutted; creating very boggy areas or hard, sharp, cratered sections adapt and twisting the ankle of the unwary.
